

What is a principle common to innovations in 3D Technology, Agile Programming, and Aircraft Safety?

Call us, and we will tell you. We will also show you how by using Innomatics™ – the Functional Innovation Toolkit, you will be able to use this and other principles to innovate for your business.

Innomatics™ The Functional Innovation Toolkit

Innomatics™ has been developed based on common principles observed in the most innovative products, processes, and business models of the last ten years. At Innomatics workshops, by simple application of the tools, our clients have generated hundreds of ideas for improving their products and processes.

“We have been loaded with tools which can be tried with our day-to-day activities”
-Participant from workshop at Trelleborg Sealing Solutions, Bangalore

“Eye opening workshop on Innovation.”
-Participant from workshop at LM Wind Power, Bangalore

“Will now force me to get out of thinking inertia...”
-Participant from workshop at Larsen & Toubro, Heavy Engineering Division, Mumbai”

So, what are you waiting for? Contact us today for a free introductory workshop on Innomatics™ - The Functional Innovation Toolkit.
